General Monitoring of School-Issued Devices

Please be aware that the District, either directly or through a technology provider, is electing to generally monitor all school-issued devices (as that term is defined by R.C. 3319.325). The monitoring will include the following features: student interactions with school-issued devices (e.g., keystrokes and web-browsing activity). The District generally monitors these features for the purpose of noncommercial education, such as instruction, technical support, or exam proctoring. Additionally, these features are typically monitored as a necessary precaution for preventing or responding to threats to life or safety.
