SEIZURE EMERGENCY PROTOCOL	
Diazepam rectal gel mg rectally PRN for sor more seizures in hours. Following adapick up child. Use Vagal Nerve Stimulator (VNS) magnet Other	ninistration of Diazepam rectal gel, call parents to
Call 911 if Seizure does not stop by itself or with VNS within Seizure does not stop within minute Child does not start waking up within Child does not start waking up within given)	
Following a seizure Child should rest in clinic. Child may return to class (specify time frame Notify parents immediately. Send a copy of the seizure record home with child for Notify physician. Other	or parents.
School Transportation Please check if student requires emergency	medication while using school transportation
